

AGRICULTURE/ALPINE FARMING

- On alpine pastures, animals are to be expected at all times. Please do not disturb the Herds and guard dogs, bypass the animals and close fences.
- Litter can be deadly for animals.
- Dog and human waste in animals' feeding is not only unsavoury but also causes diseases.
- Alpine agricultural and forestry roads are used for the cultivation of alpine landscapes. Anticipate oncoming vehicles.
- In Davos, transiting and entering hay meadows is prohibited during the growing season.

A respectful treatment of their animals and meadows is much appreciated by the Davos farmers.
